PROJECTS / LIVE PROJECTS

Project Topic	Responsive Portfolio Website
Organisation	Personal Project
Duration	Oct 2024
Brief Description	- Built a fully responsive personal portfolio website to showcase skills, projects, and contact details. - Designed with modern UI principles including mobile-first design and AOS (Animate on Scroll) effects. - Implemented using clean HTML5, CSS3, and JavaScript. - Hosted on: https://raghuvendraportfolio.netlify.app/

Project Topic	Auto_Park – Smart Parking System
Organisation	Amity University / Personal Project
Duration	March 2025
Brief Description	- Developed an intelligent parking system to detect and manage vacant parking spots using sensors or automation logic. - Implemented efficient space allocation logic to reduce parking congestion. - Integrated basic UI for user interface and real-time slot updates. - Tech Stack: Python, IoT Sensors, Security. - Hosted on: https://autopark2024.netlify.app/

Project Topic	AI-Driven Financial Fraud Detection and Prevention Services
Organisation	Marksman Technologies Pvt. Ltd.
Duration	May – June 2025
Brief Description	- An AI-based system that detects financial fraud by analyzing transaction patterns and identifying anomalies in real time. - It enhances security by flagging suspicious activities and helping prevent financial losses. - Tech Stack: Python, Machine Learning, TensorFlow, FastAPI/Flask. - Hosted on: https://github.com/kritikapanjanani/VaultSecureAI.git

Project Topic	AI-Powered chatbot for mental health support and therapy
Organisation	Marksman Technologies Pvt. Ltd.
Duration	May – June 2025

Brief Description	- Developed an AI-powered chatbot for mental health support, enabling real-time conversational therapy assistance. - Implemented NLP and RAG-based techniques to provide context-aware and empathetic responses. - Integrated features like mood tracking, session management, and interactive chat interface. - Tech Stack: Python, NLP, Transformers, FAISS, Flask/FastAPI. - Hosted on: https://github.com/Ayushiisengar/chatbot-for-mental-health-support.git

Project Topic	IoT-Driven Real-Time Cloudburst Prediction Using Atmospheric Sensors and Machine Learning
Organisation	Amity University / Minor & Major Project
Duration	December 2025 – May 2026
Brief Description	- Developing an IoT-driven system for real-time cloudburst prediction using atmospheric sensor data and machine learning models. - Implementing LSTM and XGBoost models for accurate weather pattern analysis and risk prediction. - Integrating live sensor data streaming, visualization dashboard, and alert generation system. - Tech Stack: Python, IoT Sensors, TensorFlow (LSTM), XGBoost, FastAPI. - Focus: Early warning system, disaster prevention, and real-time environmental monitoring.

ACHIEVEMENTS
• Secured 2 Bronze medals and 1 Silver medal in Carrom at college-level tournaments
• Awarded 1 gold medal and 2 certifications in Volleyball for participation in inter-college sports events
• Selected as Summer Intern at Marksman Technologies Pvt. Ltd. – Genify AI Lab (2025)
• Completed 10+ industry-recognized certifications in AI, Networking, and Automation (Cisco, NVIDIA, ServiceNow).
• Awarded “ Most Environment Friendly” at INCITE 2026 for developing an IoT-driven real-time cloudburst prediction system using atmospheric sensors and machine learning.
• Developed a capstone chatbot project with Generative AI during internship
• Built and hosted a responsive portfolio website to showcase projects and skills

TECHNICAL SKILLS
 Programming Languages: Python, JavaScript, C++, HTML5, CSS3
 Web & App Development: React.js, Node.js, Express.js, FastAPI, Flask
 AI & ML: TensorFlow, Scikit-learn, Pandas, NumPy, OpenAI GPT, LangChain, LSTM, XGBOOST
 Chatbot & Automation: Dialogflow, Rasa, Zapier/Integromat, Google TTS, ElevenLabs
 Databases: MongoDB (Atlas), Firebase, MySQL
 Tools: Git & GitHub, Postman, Figma, Canva, VS Code, Jupyter Notebook
 Networking & Security: Switching, Routing, Subnetting, Cybersecurity, Ethical Hacking
 Cloud: GitHub Pages, Netlify, vercel, google cloud, Render
